About Us

GBSCO International, which was founded in 2019, has led the way in innovation and customer service for the wholesale distribution of the building materials to civil and interior design projects.

Furthermore, providing the broadest and most complete selection of high-quality goods from a single source. Our products are supported by a skilled technical and logistical support staff that is prepared to work with you to find the best solution for each project.

Our market coverage has expanded to include a number of market categories, including construction, airports, hospitals, and general industries.

What We Do?

What We Do?

SOURCING / IMPORTING

With our greater depth of knowledge with regard to building materials products in the international market, we are glad to offer sourcing services on behalf of your business. This could be with regard to imports from GCC or other countries where there is a need for arranging a stable supply of or meeting any project needs.

BULK STORAGE

With an area of more than 2,000 Sqm, our main stores in Buri, Kingdom of Bahrain is able to store a 1 month demand of building materials to the whole country of Bahrain. The supply chain in our operations is well managed to reserve the minimum quantity of each product to meet any urgent demand in the market.

WHOLESALE DISTRIBUTION

We operate as the chain between the product manufacturers and building materials retailers or contractors in the kingdom by keeping track of the market demand and supplying the goods with the most competitive prices for our loyal customers covering every single city in Bahrain.

CUSTOMER SERVICE

Simply put, we enjoy delivering the most proactive and immediate support to customers anytime on the channel of their choice — phone, email, text, or chat round the clock. We support our customers in every single stage of their order to guarantee their satisfaction.

Mission & Vision

MISSION

Our mission is to be the largest, best, and simplest distributor of exterior and interior building materials. This means being committed to offering new and innovation solutions that allow our customers to grow and thrive.

VALUES

- Being Customer-Focused**
Listen to and work diligently for our customers.
- We Value Our Employees**
Our staff are the most valuable resource we have.
- Integrity Is Honesty**
Conducting business in a moral and ethical framework.
- Pursue Excellence**
Make every effort to be the go-to business in the markets we serve.

VISION

To take the top spot among all the **Building Materials Distributors** in the Kingdom of Bahrain.

Our Leadership

GBSCO International was founded in 2019, this year marks our 4th anniversary.

We began on our adventure with the hope of creating a business that we could all be proud of. Looking back, I am both humbled and proud of what we have accomplished.

This has truly been a team effort.

KHALDOUN ALYOUSEF
Founder & Chairman

We at GBSCO, operate with an optimum goal to take the top spot as the largest distributor of building materials in the Kingdom of Bahrain.

GBSCO is a trusted name in the construction industry and it has done so by having the ability to successfully combine devoted personnel, efficient operations, and persistent efforts to forge lasting bonds with our customers and suppliers.

6. JOINT-COMPOUNDS

7. POWDER-BASED

8. SYSTEM ACCESSORIES

Product Portfolio

1. GYPSUM BOARDS

Description

Gypsum board, commonly known as drywall is the premier building material for walls and ceilings. Designed to provide a monolithic surface when joints and fastener heads are covered with a joint treatment system, gypsum products also provide sound control, economy, versatility, quality, and convenience.

Gypsum board is the technical product name used by manufacturers for a specific board with a gypsum core and a paper facing.

Dimensions*

W 1,200 x L 2,400 x Thickness 12.5 MM

**Can be supplied with customized dimensions and thickness*

Available Types

		
 REGULAR (Ordinary)	 FIRE RESISTANT	 MOISTURE RESISTANT

Applications

Wall, ceiling, and partition systems in residential, and commercial structures.

Available Brands

			
---	---	---	--

Product Portfolio

2. CEMENT BOARDS

Description

Cement board, a combination of cement and reinforcing fibers formed into sheets of varying thickness that are typically used as an underlayment or substrate.

Gypsum board is the technical product name used by manufacturers for a specific board with a gypsum core and a paper facing.

Dimensions

W 1,200 x L 2,400 x Thickness 06, 07, 09, 10, 12, 13, 18 MM*

* Available only for ACFA PLUS

Available Types

Applications

Walls, indoor/outdoor partition systems, exterior applications, floors, cold-steel constructions, and commercial structures.

Available Brands

Product Portfolio

3. CHANNEL PROFILES

Description

GI Channel Profiles are ranges of vertical & horizontal metal studs or channels that suspends or form a frame onto which drywall or plasterboards can be placed.

They are available in several widths, and have been tested to meet fire, acoustic and structural standards. A particular feature is their knurled flange surface, which allows for easier and faster screwing of drywalls using drywall screws. This allows the contractor to complete drywalls with the minimum amount of effort.

Dimensions

Refer to our datasheet for more details on the available dimensions.

Available Thicknesses: 0.35, 0.38, 0.40, 0.45, 0.50, 0.60 up to any custom thickness.

Available Items

Furring Channel - Main Channel - GI Wall Angle
Drywall Stud - Track (Runner)

Applications

Furring Ceiling Systems & Dry Wall Partitioning.

Available Brands

Product Portfolio

4. SUSPENDED CEILING

Description

Suspended ceilings are a practical method of concealing the actual ceiling and all the complex duct-work, pipes, and wiring intricately attached to it. It is easy to install and remove, which is convenient when access is needed to repair the hidden wirings, pipes, and air duct systems.

Suspended ceilings, also known as dropped ceilings, are the best option when you want to soundproof a space, as these naturally block the sounds resonating from the floor above it. In addition, dropped ceilings offer versatility in design as there is a variety of patterns and colours available for ceiling tiles.

Dimensions

Refer to our datasheet for more details on the available dimensions.

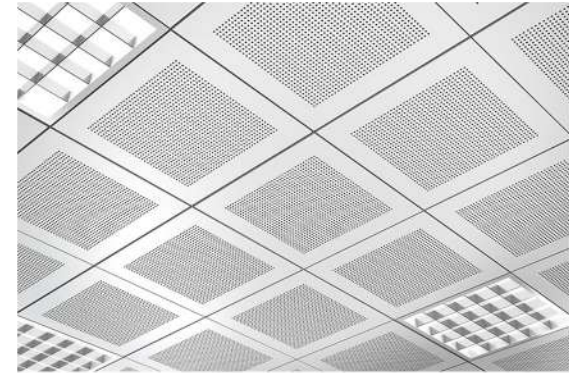

Available Items

Cross Tee - Main Tee - L-Angle - W-Angle - Ceiling Tiles

Applications

Offices, Classrooms, Laboratories, Hospitals, Airports & Other Commercial.

Available Brands

Product Portfolio

5. INSULATIONS

Description

Rockwool refers to a type of thermal insulation made from actual rocks and minerals. A wide range of products can be made from this material because of its superior ability to block heat and sound. Rockwool insulation is commonly used in building construction.

XPS Boards are popular thermal insulation materials that are closed-cell, consisting of millions of very small cells pressed together with air or gas. This make-up results in numerous benefits such as excellent lambda value, high compressive strength, water repellent, and exceptionally lightweight.

Dimensions

Refer to our datasheet for more details on the available dimensions.

Available Items

Insulation materials are widely available in different shapes, sizes, and different characteristics. Contact us for more details.

Applications

Roof, Ceiling, Drywall Partitions & Flooring

Available Brands

Product Portfolio

6. JOINT-COMPUND

Description

MULTI PURPOSE READY-MIXED JOINT COMPOUND is a Special Vinyl formulation that requires minimal mixing to thinning provides a smooth seamless finish for Gypsum Board Wall, Ceiling Joints and brick wall. Multi Purpose Joint Compound used for taping, finishing Gypsum Board Joints, filling, covering and for Final Touch-Up Coats in Interior Gypsum Board applications. It is an ideal material for embedding fasteners, corner surfaces where necessary. It can also be used to repair the crack on the brick wall surface.

Drum Weightage

Available in 5, 15, 28KG Drums

Applications

- Covering jointing, fasteners, nail heads & corner beads
- Repairing cracks, damage on walls and imperfection
- Smoothing interior wall to provide extra smooth wall before final painting

Available Brands

ASG
JOINT-COMPOUND

Product Portfolio

7. POWDER-BASED

Description

JKC WallMaxX is a white cement based wall putty formulated with Abrasion Resistant Technology (A-R-T), which protects the painted surface from flaking and cracks.

Its unique formulation gives a smooth, glossy and durable finish, brilliant whiteness while offering superior coverage.

Weightage

Available in 1, 5, 20KG Bags

Applications

- Cement-base Plaster / Coarse Plaster
- Concrete Walls & Ceiling Surfaces

Available Brands

JKcement
WallMaxX
White Cement Based Putty

Smooth & Glossy Finish

Resists Flaking

Longer Paint Life

Higher Coverage

Product Portfolio

7. POWDER-BASED

Description

UMI Gypsum Powder is inorganic mineral made from natural gypsum (Gypsum Rock) using suitable calcination processes. It provides high compressive strength and more fineness shining in addition to high fluidity and workability.

Weightage

Available 40KG Bags

Applications

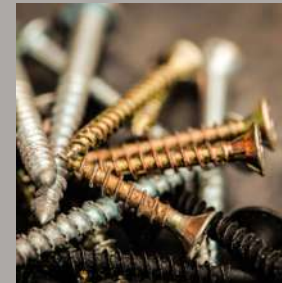

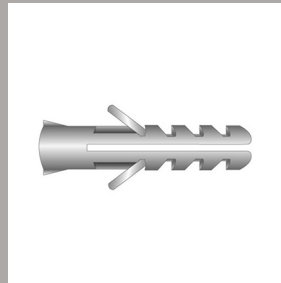

- Interior & Exterior Decoration Works
- Molds for making decorative forms (e.g. cornice)

Available Brands
